Explanation of the two-letter codes and other abbreviations are given in the "Guidance Notes on Codes and Abbreviations" at the beginning of every regular edition of the PCT Gazette.

IMPLANT, THERAPEUTIC AGENT AND MICELLE

(57) Abstract: The invention relates to an implant, a therapeutic agent, the use of micelles, which are formed from both surfactants as well as active substance molecules, and to a micelle. In order to achieve a defined delivery behavior through pores of a diffusion element, the active substance molecules are covered with surfactants.
